# New chapter of Journal of the European Optical Society Rapid Publications

Kai-Erik Peiponen

Journal of the European Optical Society Rapid Publications (JEOS: RP) started to publish in 2006 scientific articles in the fields of photonics & optics. JEOS: RP has started from 1<sup>st</sup> May, 2016 a new chapter, namely SpringerOpen is now our publishing partner. This will be a new beginning in the sense that we work with a professional publishing partner that has a long experience in publishing scientific journals in variety of scientific fields. The new partner will be an important asset regarding the manuscript processing and publication of accepted articles in a timely manner, and all process phases are assisted by skillful and experienced persons of SpringerOpen who are working in the editorial office of JEOS: RP. The same high scientific standard as before will be our guideline for acceptance of manuscripts in the fields of photonics & optics for publication. We continue publication of Rapid Publications and occasionally also review articles and critical reviews. I hope that JEOS: RP's collaboration with SpringerOpen will be a good start to provide a nice European option for publishing interesting articles on the theory and applications of photonics & optics. Furthermore, I hope that we can offer a dynamic publication forum both in classical and also in new emerging fields that are devoted to, or involve photonics & optics.

Editor-in-Chief
